

A fact rich session was addressed by Prof. Bhagwati Prakash Sharma, President, Pacific University, Udaipur & Achievers Awardee 2016 on "On-going Economic Challenges in India".

He underlined various issues prevailing in the nation that are hampering the economic progress. These include low share of contribution from agriculture & manufacturing sector, declining exports, alarming increase in NPAs and sick units, lack of competence due to high interest rates, reduction in indirect tax collection & excessive increase in Investment-Income Deficit.

Development of sensitisation and following acquisitions approach were highlighted as need of the hour.

Students are grateful to Sharma Sir for such an interesting and insightful session.
